

To feed through a garden hose or drip system;

Step 1. Pour 1 - 1 pound packet of EZ-GRO fertilizer in the tank for every 3,000 square feet of area being fertilized. Add other products as recommended. **Fill the tank with water until all air is out of the tank.** The system will mix the products automatically when the water is turned on.

Capacity - 10 pounds or 1 gallon

Step 2. Connect vacuum breaker, hose bib adaptor and hose to the hose bib.

This system CAN BE INSTALLED UNDER CONSTANT PRESSURE so a multi-zone timer can be installed after the hose bib adaptor to feed multiple zones.

Step 3. Screw tank cap on the tank and connect tubing to the cap and hose bib adaptor. Connect blue to blue and green to green. The tubing slides over the connectors on the hose bib adaptor and presses into the connector on the cap.

Step 4. Set the flow adjustment on the cap to fast feed for quick feeding and to slow feed to feed slowly every time you water. Set off when not in use.

Premium LAWN & GARDEN FEEDER

Feeds the entire landscape and garden

FEEDS THROUGH

One Step Application

of water soluble and liquid lawn and garden products.
Replaces all other spreaders and sprayers.

Sustainable Lawn & Garden Care

Saves water while it increases plant health.
Virtually eliminates exposure to toxic chemicals.

A Green Solutions Company™

1 Gal. Capacity
(3.8 Liters)

Fill with any liquid or water soluble product. Up to 25,000 square feet coverage in one filling with EZ-GRO concentrated products.

The *Premium* Lawn & Garden Feeder

The better choice!

Easy to Use - Saves Time

Fertilize the lawn, flowers, trees and vegetable garden in

One Easy Step

Takes minutes instead of hours

Simply combine any liquid or water soluble product in the tank and the system does the mixing and measuring automatically while you water. The system is adjustable so you can feed the entire landscape and garden quickly or you can attach it to the lawn sprinkler or drip system and feed slowly every time you water. **Since it can apply all products in one step it can replace all of your other spreaders, sprayers and applicators.**

Sustainable Lawn & Garden Care

Protecting the Environment Without Sacrificing Results

- **Virtually eliminates exposure to harmful chemicals**
- **Saves water by building a stronger & healthier plant root structure**
- **Reduces or eliminates the need for herbicides and pesticides**
- **Reduces carbon footprint - uses up to 80% less fertilizer**
- **Dispenses natural and organic products**
- **Virtually eliminates toxic runoff and leaching**

Superior Results!

Enjoy the Greenest Lawn in the Neighborhood!

EZ-FLO's patented technology feeds more accurately and efficiently creating better nutrient uptake resulting in healthier plants.

Most fertilizer sprayers don't apply products evenly so some plants and lawn areas get too much fertilizer while others don't get enough. When plants and lawns are fed correctly they are healthier and naturally more resistant to insects and disease.

Organically Balanced Fertilizers and Controls

EZ-GRO water soluble fertilizers are a unique blend of highly concentrated plant nutrients, organic bio-stimulants, and beneficial micro-biology. This unparalleled formulation provides astonishing results without any complicated mixing and measuring. The resulting affect is a total landscape solution that beautifies while reducing weeds and insects naturally.

EZ Organic Critter Control repels deer, rabbits, moles, voles and numerous other plant eating critters but will not harm them. It has no odor and does not affect household pets.
