

# Easy, Reliable Water Resistance

## 3M™ Direct Bury Splices DBR/Y-6 and DB0/B-6

- UL Listed for direct bury applications
- Reliable moisture-resistant connections
- Quick-bite connector accepts wide wire combination range
- Cap on high-impact tube provides good strain relief
- Quick and easy to install for long-term reliability

These premium kits electrically connect and provide moisture seal wiring up to 600 volts which may be exposed to water. The kits are excellent for water-intensive applications such as golf courses, irrigation controls and outdoor lighting.

The design is simple but reliable and quick to install. 3M Direct Bury Splice kits include two 3M Performance Plus Wire Connectors with quick bite and smooth twist plus two high-impact, UV-resistant tubes filled with moisture-resistant grease.
